

## **Infovell, Inc. Announces Thomas DiGrazia as Vice President of Product**

**MENLO PARK, Calif., August 15, 2006** -- Infovell, Inc., a provider in new, dynamic, concept-based search, today announced that Thomas DiGrazia has joined the company as vice president of product.

DiGrazia will be based in Menlo Park, at Infovell, Inc.'s corporate headquarters.

"I am very pleased Tom has agreed to join Infovell. His background in product management and tremendous understanding of search technology, architecture and scalability will be invaluable to the future of Infovell," said Qianjin Hu, Founder and General Manager of Infovell. "In his new role, Tom will help productize the Infovell search technology and help us get it ready for commercial use."

DiGrazia brings a wealth of experience to his new role, having previously worked for eBay where he led the program to development, implementation and scale-up of the eBay search engine as well as the complete rewrite of the search and listings presentation and business logic tiers. Tom also managed a team of senior architects with responsibility for scalability strategy, infrastructure architecture, acquisition integration, and evaluation and vetting of new technologies coming into eBay. Prior to eBay and joining Infovell, Tom also served in a variety of management roles at Excite@Home, Zoho and Raychem Corporation. He earned his B.S. in Statistics from the University of California at Berkeley.

"I'm excited to join Infovell. The search technology the founders have developed is unlike anything I've seen before," said DiGrazia. "Infovell has a unique opportunity to expand search capabilities beyond the limitations of keyword search and drive a level of relevance never before realized."

### **About Infovell Inc.**

Infovell enables organizations and individuals to quickly find, organize and utilize the information needed for a more informed decision making process, regardless of where the data exists.

Knowledge is power.

Utilizing a unique Concept-Based Discovery Engine, Infovell customers can do a deep dive into the most relevant information available without requiring metadata or creating hard-to-manage taxonomies.

This innovative technology enables searching for information to become a quick and easy process and for the first time, make the deep web content more accessible and useful.

By managing the collaboration of data platforms, companies can empower their workers to find high value information for better decision-making support across the enterprise.
