

Infovell Names John Dorman Non-Executive Chairman of the Board

MENLO PARK, Calif., September 6, 2007 -- Infovell, Inc., a provider in new, dynamic, concept-based search, today announced that John Dorman has joined the company's Board of Directors as its Non-Executive Chairman of the Board.

“John Dorman brings a successful track record in building and growing successful organizations,” said Qianjin Hu, Founder of Infovell. “His experience in growing businesses, his understanding of the software market and his extensive contacts in the business world will be a tremendous help to our efforts.”

“The Infovell technology represents a tremendous leap forward in the area of search,” said Dorman. “I believe individuals and organizations have been craving the type of search experience Infovell has to offer and I look forward to helping the company bring their products to market.”

John Dorman retired as Chairman, President and CEO of Digital Insight Corporation in 2004 and remained active on the company's Board of Directors until it was sold to Intuit Corporation for \$1.35 billion in 2007. Prior to joining Digital Insight in 1998, he was Senior Vice President in charge of the Global Financial Services Division of Oracle Corporation. Dorman was promoted to this position shortly after Oracle acquired Treasury Services Corporation, where Dorman was the Founder, Chairman and CEO. Previously, Dorman spent 11 years at Union Bank of California in a variety of management positions.

Mr. Dorman received a BA degree with a double major in Business Administration and Philosophy from Occidental College in 1971 and an MBA degree in Finance from University of Southern California in 1978. Mr. Dorman is currently on the Board of Directors of The Yosemite Fund, Data Direct Networks Inc. and Consumer Healthcare Advantage LLC. He was named Entrepreneur of the Year in the Greater Los Angeles Area by Ernst & Young in 2003 and was also named to the National Entrepreneur of the Year Hall of Fame.

About Infovell Inc.

Infovell enables organizations and individuals to quickly find, organize and utilize the information needed for a more informed decision making process, regardless of where the data resides.

Utilizing a unique Concept-Based Discovery Engine, Infovell customers can do a deep dive into the most relevant information available without requiring metadata or creating hard-to-manage taxonomies.

This innovative technology enables searching for information to become a quick and easy process and for the first time, make the deep web content more accessible and useful.

By managing the collaboration of data platforms, companies can empower their workers to find high value information for better decision-making support across the enterprise.
